

Project 4 - Portrait

PROJECT 04 PORTRAIT: Head, Heart, Hand, Tummy, Legs,
Feet

You'll need a photo of your face too

CREATE A FOLDER FOR THE PROJECT

1. In your class folder, open your HTML folder
2. Inside that, create a folder called **04 Portrait**
3. Copy/paste the Portrait Template folder from the V drive to there.
4. Make sure that you're working on your own copy, and not the copy in the V drive - it won't save and you'll lose your work.

SAVE YOUR PICTURES

1. You'll need a photo of your face.
2. Once you've got that in your folder, go search for the pictures that you want to use: heart (chest area), hand, tummy, legs and feet.
 - a. In PhotoShop, resize them so they're **all the same size** - mine are **160 x 120** pixels.
 - b. You'll also need an icon to replace Powered By at the bottom of the page
3. **Make sure that you save them in your 04 Portrait>Portrait Template> folder NOT anywhere else!! This is vitally important.**

CHANGE THE CODE:

I'll give you a screen capture of what to change here (this is [Page 1](#) and this is [Page 2](#)) but you'll need to watch the movie for precise details.

Resources:

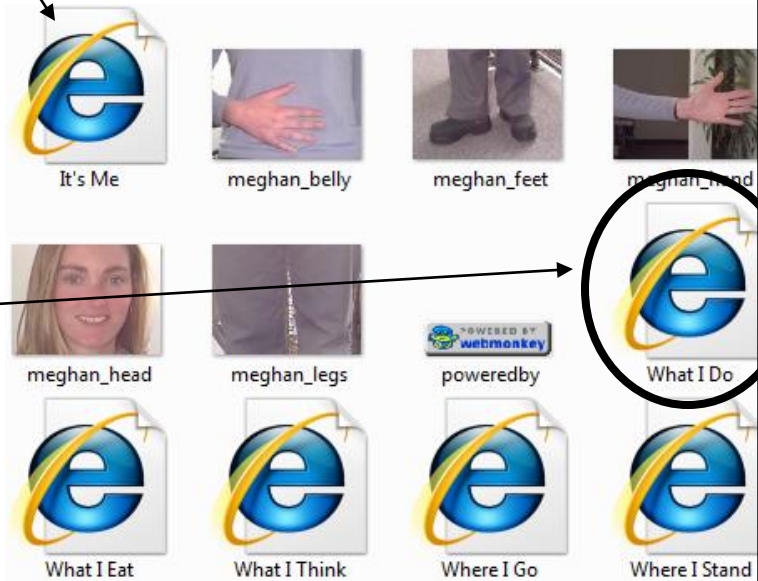

Hexadecimal Codes [here](#)

HTML Cheat Sheet [here](#)

CREATE YOUR HTML PAGES:

I give you the home page (It's Me.html), but I only give you one of the 5 link html pages that you need. You'll have to duplicate and rename them.

1. Right-click on **What I Do.html** (the hand picture) - **Copy**
2. Next, paste to get another copy. It'll be called **What I Do.html** - **Copy**
3. Right-click on it > **Rename** - give it an appropriate name (e.g. What I Eat.html) - Repeat this 4 times all told - so that you have a total of 6 HTML pages

- a. You need a page for Head, Tummy, Feet and Legs
- b. Make sure that you give them an appropriate name, and that you'll be able to spell the page name exactly.

There are 2 links to each page: a text link and a picture link.

There are several pages to do - change everything, including background, pictures, text, links, link colors, e-mail links ...). Put hyperlinks on both text and pictures, and make sure that you link back to your home page.

REQUIREMENTS:

1. On each of the webpages, you will see what you need to change on [Page 1](#) and [Page 2](#).
2. Each picture links to its own page, and there's also a text link to that page.
3. Make sure that the link pages link back to the home page.

BIG HINT: MAKE SURE THAT YOUR PICTURES ARE ALL THE SAME SIZE, IN JPG FORMAT, AND NO BIGGER THAN 2.5". They can be square or rectangle - just make sure that they're all exactly the same size.

FOR GRADING: To get full credit, you'll have to make sure that you've altered everything, your pages are consistent in terms of color/background, font and all your hyperlinks should work. The pictures have to be appropriate (feet in the feet page, for instance). You need a minimum of 3 sentences about yourself on each page, and the minimum doesn't get an A. Your sentences have to show some effort and creativity - very short sentences don't count for effort.

Here's the Color URL: <http://www.lissaexplains.com/color.shtml>

Hi. My name is Danoush, and this page is all about me. Not about you. Sorry.
